

Dr. Christine Lepird Biography

Dr. Christine Lepird is an assistant instructor for the Johns Hopkins University Engineering for Professionals program. She's spent the past decade researching in academia and applying her data science skillset to industry. Her research combines social network analysis, statistics, and data science to understand how news travels in online ecosystems. She's a leading expert on the topic of pink slime journalism, a phenomenon wherein companies establish "local" news websites without a local presence in areas with high political impact. She's interned with the Camera & Reels team at Instagram, created recommender systems for Wayfair's Joss & Main brand, and developed web apps for the Department of Defense while working at the Johns Hopkins Applied Physics Lab.

Lepird holds a Ph.D. from the Carnegie Mellon University's School of Computer Science, a Masters degree in Computer Science from Johns Hopkins' Engineering for Professionals program, and Bachelor's degrees in Mathematics and Management Operations Research from the Massachusetts Institute of Technology.

Lepird lives in Pennsylvania with her husband, two kids, two cats, and one dog.
